

Buzzer Bridge Rectifiers

Useful Gadgets

SM1224BZ-1A
Buzzer Bridge Rectifier

SM1224-TBZ
Buzzer Bridge Rectifier

MEC Buzzer Bridge Rectifiers can serve as an added security to your access control system. The SM1224BZ-1A has two combined features: an In-line power controller with built-in surge protection and a piezo buzzer beeps every time the door is being activated to open. The SM1224-TBZ includes adjustable relock time delay and provides countdown beeps until the door is locked. These models can be connected to fail-secure or fail-safe electrified locks.

Models	Input Voltage (VAC/DC)	Output Voltage	Output Overload and Short Circuit Protection	Built-in Piezo Buzzer (80db)	Red LED Output Indicator	Anti-tailgating Function	Selectable Relock Time Delay (5, 15, 30 or 60 seconds)
